NOTES:

- 1) The bidder is required to create facilities for transporting the crude oil / gas from well head to nearest OIL installation.
- 2) Separate bowzer contract hiring is to be arranged by bidders whenever such movement is required.
- 3) The delivery charges of crude oil to refineries through OIL's trunk pipeline is not included. This amount payable to OIL by the bidders is recoverable from the refineries.
- 4) All taxes and Government levies will be on bidder's account.
- 5) Cost of any new facilities, if required, to be created by OIL for transportation/processing of crude oil and natural gas produced by DSF-II fields will be charged extra.
Creation of any new facilities for processing of crude oil and natural gas (associated or non-associated) produced in DSF fields have not been considered. Any cost incurred on creation of such facilities, if required, will be separately chargeable to the DSF operator.
- 6) The indicated transportation and processing charges are based on cost data of FY 2017-18 and are subject to change in future based on actual costs at the time of providing the facilities.
